Phase-Out | Alcatel-Lucent OmniSwitch 6850E family end of sale notification

This document is to announce the end of sale (EOS) of the Alcatel-Lucent OmniSwitch® 6850E family of products. These products will be available for purchase until April 30, 2016.

Some components of OS6850E are getting close to their end of life, which increases the challenges in procurement, order fulfilment and manufacturing.

The OS6850E family is replaced by the innovative advanced Alcatel-Lucent OmniSwitch 6860 Stackable LAN Switch family which has been in production since 2014.

What is being phased out?

This eFlash announces the end of sale of the following products:

Model No	Model Description	Replacement Product(s)
OS6850EP24	OS6850E-P24: Gigabit Ethernet L3 fixed configuration chassis in a 1U form factor with 20 RJ-45 10/100/1000 BaseT PoE ports, 4 combo ports (10/100/1000 BaseT or 1000 BaseX), and 2 CX-4 ports. The 2 CX-4 ports can be used as stacking ports or as connectors for the OS6-XNI-U2 that supports 2 SFP+ 10GigE ports.	OS6860-P24 OS6860E-P24

Replacement Product

The OmniSwitch 6860E Stackable LAN Switch (OS6860) is one of the industry's most advanced family of layer-3 switches that can be used in campus or data center networks. It provides an impressive performance with wire-rate, non-blocking access ports of up to 48 GigE, as well as four 10 GigE uplink ports and up to 80 GigE of stacking bandwidth.

OmniSwitch 6860 cannot be used in the same stack with the older OS6850E products, because it uses the latest virtual chassis technology. The power supplies of the two products are also not interchangeable because the OS6860 models have internal, hot-swappable power supplies.

For more information on OS6860, visit the Business Portal:

<https://businessportal2.alcatel-lucent.com/products/lan-switches/omniswitch-6860-and-6860e-stackable-lan-switches>

Time Line - Order Fulfillment

Final orders will be accepted until April 30, 2016, however orders for the various transceiver types and accessories will be available for a longer period.

Time Line - Support

If the product is under a valid support agreement, software support is provided as stated in our policies, that is, two years after the last software release for the Alcatel-Lucent Operating System (AOS) running on OS6850E. After this period, software support is no longer provided.

If the product is under a valid support agreement, hardware support and technical support are also provided as stated in our policies, that is, five years after the end-of-sales notification (until November 31, 2020). The original OS6850E device is offered as a replacement as long as there are products available in the inventory. If the original device is not available, another replacement product is sent.

Extended software support for the OmniSwitch 6850E may be available for purchase for large customers. Contact the Enterprise Global Welcome Center to request information.

For your convenience, this eFlash will be available in French, German and Spanish on the Business Portal a few days after the publication in English.

The content of this eFlash may not apply to your region and/or to your accreditation level. Contact our [Support Center](#) to create an eService Request for further information.
